MIXED/CONSTRUCTION TRANSPORT

- ▶ Improved mileage, even wear picture
- ▶ High durability and resistance to damage
- ▶ Better self-cleaning

Matador is launching the new **FM 4** front axle truck tyre for mixed/construction transportation. The Matador FM 4 features a wide 4-groove tread pattern for very good mileage and even wear by combining modern material and design features. Good damage resistance and high overall durability are achieved by a robust carcass construction. A self-cleaning groove layout helps avoiding stone retention and offers better steering control. The new Matador FM 4 is available in the size **315/80 R22.5**.
